

**Thank you for choosing
MADICO window film!**

To ensure proper curing of your window film, please avoid rolling down the windows for 3 days. It can take 3 weeks or longer for bubbles and moisture to completely dry out of film.

CARE INSTRUCTIONS

A scratch-resistant coating on the surface of the film helps protect it from damage, however, care should be taken to keep your film in good condition:

1. Clean the film using any normal, household, glass-cleaning solution or plain, soapy water.
2. Use soft, clean, lint-free towels or sponges to clean and dry the windows.
3. Do not use any cleaning solution containing abrasive materials.
4. Be careful when using any tools or sharp instruments on or around the windows that could cut, gouge, or scratch the film. Your MADICO warranty does not cover mechanical damage.
